ALLOWANCE

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on January 21, 2009 has been entered.

Drawings

The replacement drawings for Fig. 3 and 4 were received on January 21, 2009. These drawings are acceptable.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In claim 1 line 31, change "centre" to "center."

Election/Restrictions

This application is in condition for allowance except for the presence of claims 18 – 23 directed to an invention non-elected without traverse. Accordingly, claims 18- 23 have been cancelled.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the prior art does not teach the instant claim limitation that the feed chute is positioned for passing the solids downwardly through the roof between a respective lance and the sidewall of the metallurgical vessel in a radial direction. This positioning of the feed chute causes the particulate matter fed to the vessel to flow in the substantially downwardly directed flow of post-combusted gases so they do not flow in the upwardly directed flow of post-combusted gases in the center of the vessel and leave the vessel. Also, the prior art does not teach that the lance discharge end does not extend into a region of the vessel interior below the center opening. This feature is beneficial because post combustion gases that rise in the central portion would conflict with the downwardly directed gas from the lances. Furthermore, the prior art does not teach that the lances are positioned to avoid contact with molten material passing downwards from the melting cyclone to the metallurgical vessel. This feature would prevent the molten material from damaging the lances. Finally, the Rule 132 Declaration states that the position of the feed chute of Klaassen is not a functional equivalent of the position of the chute in the presently claimed metallurgical vessel because the positioning of the chute of the instant invention has the advantage that the particles are entrained towards the slag layer with the substantially downward flow of post-combusted gases at the sidewall of the vessel whereas with the positioning of Klaassen the majority of particles are entrained in the upwardly directed flow of post-combusted gases in the center of the vessel and leave the vessel.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to CAITLIN FOGARTY whose telephone number is (571)270-3589. The examiner can normally be reached on Monday - Friday 8:00 AM - 5:30 PM EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Roy King can be reached on (571) 272-1244. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
